Employment

The Arena Group | Sports Illustrated

2021 - 2023

Software Engineer - Full Stack

- Worked with small, fully remote, agile team to bring new features and improvements to the Sports Illustrated site.
- Helped create sport statistics APIs for all major leagues and sports to show relevant data in leaderboards, game pages, and team pages.
- Created widgets, such as Draft Trackers and leaderboards, that improved page views on important events like NBA and NFL drafts, March Madness, and the Superbowl.
- As part of a team effort, helped implement a new site redesign that introduced a more modern look and feel for a better user experience.

Oracle | NetSuite

2016 - 2020

Senior Web Developer - Full Stack

- Helped build over a dozen full-stack eCommerce web applications using the Single Page Application model for a variety of clients, such as University Co-op and Frito-Lay.
- Implemented completely new custom features leveraging the SuiteCommerce Advanced (SCA) eCommerce framework using development best practices.
- Last worked on software engineering team efficiencies aimed at improving team throughput, code/config migration, and automating developer workflow using Node for the server and Vue for the frontend.

Education

The University of Texas at Austin

2010 - 2015

BA in Computer Science

Projects

• Paddle Flows

paddleflows.netlify.app/

Display central Texas river data using React.js, Bulma, USGS API, and OpenWeather API.

• Secloop

mdelvalle.github.io/secloop/

Loop sections of SoundCloud songs using vanilla HTML, CSS, and JavaScript.
